Professional Tracking Software

Peninsula QuickTrack professional tracking software helps you maintain and check the location of items amongst many users and locations.

Designed to be as user friendly as possible, QuickTrack combines an SQL driven database with an easy to use interface and Barcode technology.

You can connect a barcode reader directly to the software. This functionality is seamlessly integrated for maximum ease of use.

Peninsula have over 15 years of experience as a leader in the Barcode data management field enabling customers to reduce costs and increase productivity. Peninsula's customers include Marks & Spencer, Dyson, Black & Decker, Cambridge University Press and many others.

Features

Peninsula QuickTrack is an easy to use application for Macintosh and Windows.

QuickTrack allows you to easily and quickly pinpoint item location and users.

Barcode reading and printing is included for fast, error free data input.

You can still use the system without Barcodes if you want to.

The in built barcoding makes using the system much easier, simply scan the item and the current locations and user is shown in a list.

You can book in and out items with the click of the mouse or scan of the barcode.

Full application based with integrated SQL database.

Includes everything you need to manage your lending within the hour

QuickTrack is the latest technology at an unbelievable price.

Integrated Barcode Printing

You can print barcode labels onto a dot matrix, laser or ink jet printer

Customisable

While the product is set up to meet most peoples requirements.

You can also customise Labels for fields and other items by the use of personalities. These are preset for various uses.

If you need more help or customisation please contact Peninsula's Customisation Team at custom@peninsula-group.com

Benefits
